ASSET MANAGEMENT & LIFE CYCLE ENGINEERING

Asset Management & Life Cycle Engineering

To enable proper and long-term maintenance planning for a huge and heterogeneous set of engineering structures VCE developed an integrated life cycle management tool that offers tailored solutions with regard to the given location, involved materials, fabricates and the underlying design code at the time of construction.

Für die Erhaltungsplanung einer großen Anzahl verschiedenartiger Bauwerke über einen langen Zeitraum wurde von VCE ein integrales Life Cycle Modell entwickelt, das an die Gegebenheiten und speziellen Anforderungen jedes einzelnen Projekts angepasst werden kann.
